RE: Review of NOV-88-20-1-1 Informal Abatement Response, Co-Op Mining Company, Bear Canyon Mine, ACT/015/025, Folder #2, Emery County, Utah

The operator apparently informally submitted materials as an abatement response to NOV-88-20-1-1. Water monitoring stations identified, in response materials, as SBC-8 and SBC-7 do not agree with stations designated SBC-8 and SBC-7 in the recompiled PAP. Underground water survey data are shown on mining sequence illustrations (Plates 3-4 and 3-4a).

Recommendations

1. Request the operator to formally submit the abatement response.
2. Request the operator to correct the discrepancy in the locations of stations SBC-8 and SBC-7.
3. Direct that mining sequence illustrations showing underground water survey information be revised to be incorporated into the Hydrology Chapter as Plates with seven series numbers.
